

Stage area

This diagram illustrates our set-up arrangements and demonstrates our approximate space requirements. We appreciate this will vary from venue to venue. The stage area must be flat, dry and even and made from a solid material of sufficient strength to support the band and their equipment. The performance area must be a minimum of 7m (23ft) wide by 3.5m (11ft) deep. We require 2 x 13 amp main sockets for the PA system and instruments and 2 x 13 amp sockets for the lighting system.

Madison Heights ensure to set up and dismantle all equipment as carefully as possible to cause the minimum disruption to an event and to the audience.

- Set-up and soundcheck time: 60 - 90 minutes
- Pack-up time: 60 minutes
- Facilities: A room big enough for ten people to change and store our instrument cases.
